

Sept 14, 2020

Dear Neighbours,

This letter is to correct a mistake in my letter dated August 20, 2020 that was posted on Dev Tracker. In section 3 “Landscape Design”, second paragraph I noted “... a conscious effort was made to save the existing conifer located near the **northeast** property line ...”. The tree being referenced is actually in the **northwest** area of the property, towards the top of the driveway.

There were also some questions around the Tree Totals for this proposal, which is clarified below. This information is also updated on the Landscape Plan, which I submitted to the City for posting on Dev Tracker.

- Number of Bylaw protected trees: 19
- Number of Bylaw protected trees onsite: 8
- Number of Bylaw protected trees to be preserved: 13
- Number of Bylaw protected trees to be removed: 6
- Number of new proposed trees being added on site: 21
- Total trees on site: 23 (net increase of 15 trees)

My apologies for any confusion.

Sincerely,

Kim Colpman
