Project Information Summary		
	m2	sq.ft.
Site area	4,152	44,692
CRU / restaurant area (L1)	234	2,519
Residential Lobbies (L1)	117	1,259
Childcare floor area (L1)	400	4,306
Office Lobby (L1)	170	1,830
Meeting Facility (L1)	783	8,428
Circulation & service space (L1)	361	3,886
Office floor area (L2-3)	3,100	33,368
Residential floor area (L2-19)	11,887	127,951
Circulation & service space (L2-PH)	2,628	28,288
Total floor area	19,900	214,202
Floor Space Ratio	**4.79**	
Total number of residential units	175	
Number of storeys	19 & 5	
Total bylaw parking count	233	
Total parking provided*	192	
Proposed parking variance	41	
Total long term bicycle parking	261	
Total short term bicycle parking	52	

Note: Refer to Parking & TDM Study by Watt Consulating Group for information on the parking variance rationale.

sheet no. A1.0

Development of the Design Concept:

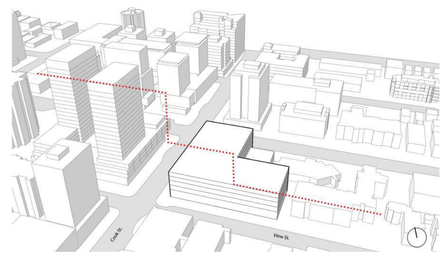

1 Site extent and area

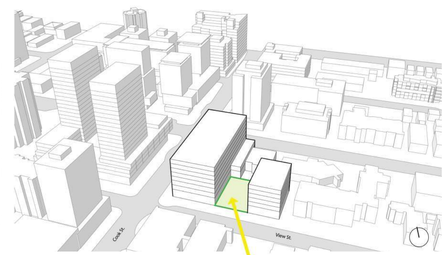

FSR 5.0

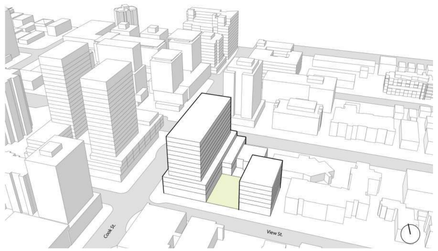

2 Simple illustration of the site at 6 storeys

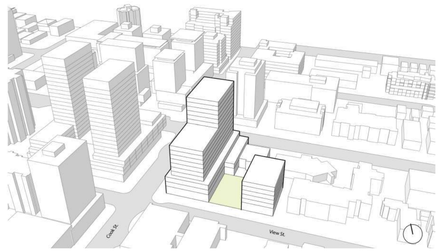

3 At the edge of downtown, building heights transition to the neighbourhood scale

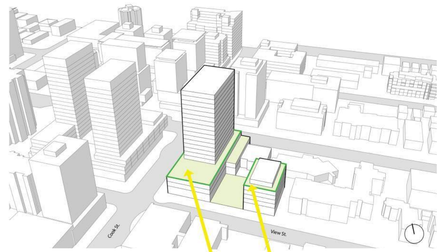

4 Divided into two buildings, an open green space is created

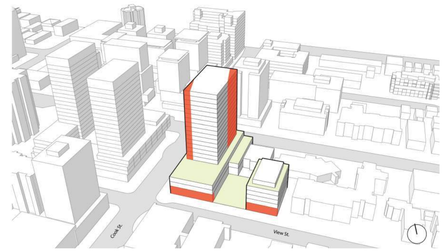

5 The tower building on Cook Street steps to create a podium and street walls

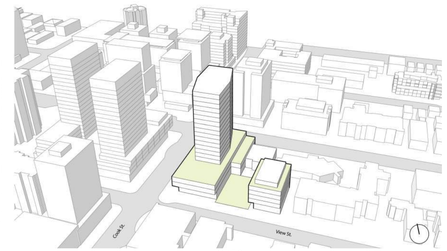

6 The tower steps to place more height at the main corner of Yates and Cook Streets

7 The tower footprint is reduced in bulk to create a landscaped roof deck for residents

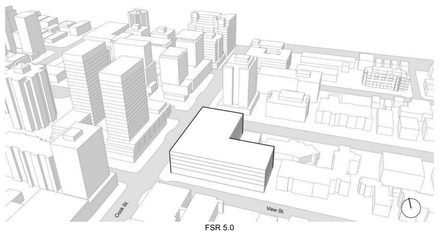

8 Refinements to the building form expand the ground floor public space and reduce tower shade impacts

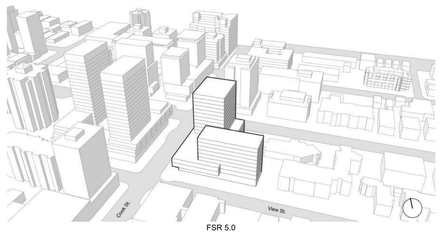

FSR 5.0

9 The proposed concept design

Alternative Massing Comparison

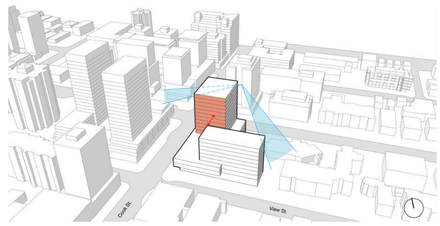

FSR 5.0

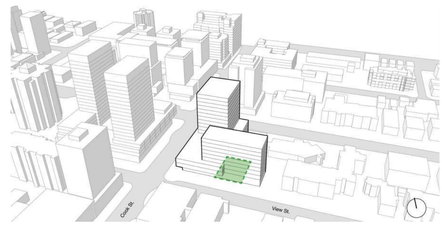

FSR 5.0

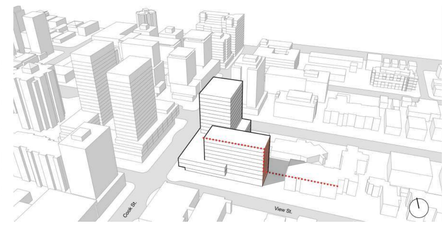

Floor area divided between two towers: 14 storeys at Cook & Yates, 9 storeys at View

Limited space for clearance between the two towers.
High-rise tower on View significantly blocks Southward views from the Nest Building

No green space for Childcare

Abrupt transition to the existing (3 storeys) and anticipated long-term (6 storeys) residential neighbourhood

GENERAL NOTES

1. Work performed shall comply with the following: a) These General Notes, and Construction Documents and Specifications; b) Canadian Landscape Standards, Current Edition (CLS-CE); and c) All applicable local, provincial, and federal codes, ordinances, and regulations.
2. Contractor shall be responsible for verifying all existing site conditions including location of all property lines, existing structures, utilities, and buried infrastructure. Verify all field conditions prior to commencing work.
3. Contractor is responsible for determining means and methods for construction. These drawings may indicate a limit of proposed improvements or limit of work for the delineation of expected extents of disturbance. Should limits of disturbance exceed boundaries defined in drawings, contractor shall contact Landscape Architect for resolution.
4. Contractor is responsible for repairing all work disturbed by construction outside of limit lines defined on drawings or through their means and methods to a condition better than or equal to the existing conditions prior to commencement of construction at no additional cost to the owner.
5. Contractor is responsible for maintaining a complete up-to-date set of drawings and specifications at the construction site and ensuring the documents are readily available for review by the Landscape Architect and governing agency.
6. Contractor is responsible for coordination of all designs, drawings, specifications and other documents or publications upon which construction is based. Any discrepencies with the drawings and/or specifications and site conditions shall be brought to the attention of the Landscape Architect, prior to proceeding with construction.
7. The drawings and specifications are complementary to one another and implied to correspond with one another. Any discrepencies should be brought to the attention of the Landscape Architect for resolution immediately.
8. General Contractor and/or sub-contractors are responsible for all costs related to production and submission to consultant of all landscape as-built information including irrigation.

TREE RETENTION AND REMOVAL NOTES

1. Tree protection fencing, for existing trees, to be installed prior to commencement of all site work. Refer to Arborist's plans for location of tree protection fencing, and protection fencing detail.
2. Refer to arborist's report for detailed information for existing tree resources.

SITE GRADING AND DRAINAGE NOTES

1. All elevations are in meters.
2. Refer to Architectural plans, sections and elevations for top of slab elevations. Slab elevations indicated on Landscape drawings are for reference only. Report any discrepancies to consultant for review and response.
3. All road, public walkway and vehicular drive aisles and parking area elevations indicated on the Landscape drawings are for reference only. Refer to Civil Engineering drawings. Report any discrepancies to consultant for review and response.
4. Confirm all existing grades prior to contruction. Report any discrepancies to consultant for review and response.
5. Unless otherwise noted provide a minimum slope of 2% on all hard and soft Landscape areas to ensure positive drainage away from buildings, to rain gardens, or to drainage devices.
6. All landscape areas shall not exceed a maximum slope of 3:1 in all instances.
7. Upon discovery, contractor to refrain from blasting rock to meet landscape subgrades. Contractor to contact Landscape Architect on how to proceed in each instance.

IRRIGATION NOTES

1. Contractor to provide irrigation system for all planters to current IIABC Standards and Contract Specifications.
2. All specified work to meet the project specifications, and all standards or specifications established in the lastest edition of the Canadian Landscape Standard and IIABC standards.
3. Design/build drawings for detailed irrigation plan to be submitted to Contract Administrator in PDF and .dwg formats at least two weeks prior to commencement of irrigation installation
4. Utilities - Contractor to verify location of all on-site utilities, prior to construction. Restoration of damaged utilities shall be made at the contractor's expense, to the satisfaction of the owner's representatives.
5. Refer to electrical drawings for electrical service.
6. Controller and backflow prevention device to be located in Mechanical Room, unless otherwise noted. Refer to Mechanical drawings for size and location of irrigation service.
7. Contractor to verify pressure and flow prior to installation of irrigation and notify owner's representative in writing if such data adversely affects the operation of the system.
8. Sleeves shall be installed at the necessary depths, prior to pavement construction. Sleeving shall extend 300 mm from edge of paving into planting area, and shall have ends marked above grade unless otherwise shown.
9. Contractor to field fit irrigation system around existing trees, to limit disturbance to root systems.
10. At various milestones during construction, inspection and testing of components will be required to ensure that the performance of irrigation system meets standards and specifications. Contractor to provide equipment and personnel necessary for performance of inspections and tests. Conduct all inspections and tests in the presence of the contract administrator. Keep work uncovered and accessible until successful completeition of inspection or test.
11. Over spray onto hardscape areas to be minimized. Use drip irrigation within small planting areas to avoid overspray.
12. Trees within shrub or rain garden areas to be irrigated with spray heads.
13. Trees in Plaza in hard pavement (soil cells below) to recieve temporary irrigation system around root collar and permanent drip irrigation system

GROWING MEDIUM NOTES

1. Refer to Landscape Specifications for growing medium properties by soil type.
2. Advise Contract Administrator of sources of growing medium to be utilized 14 days in advance of starting work.
3. Growing medium properties and handling shall meet CLS-CE (see Section 6 CLS-CE).
4. Contractor is responsible for soil analysis and amendment requirements to supply suitable growing medium, as specified by testing agency. Soil analysis and amendment costs shall be included in the price for the work.
5. Submit to the Landscape Architect a copy of the soil analysis report from Pacific Soil Analysis Inc. 5-11720 Voyageur Way, Richmond, BC, V6X 3G9. p. 604- 273-8226. The analysis shall be of tests done on the proposed growing medium from stratified samples taken from the supply source. Costs of the initial and all subsequent tests to ensure compliance with the specifications shall be borne by the Contractor.
6. Contract Administrator will collect sample of growing medium in place and determine acceptance of material, depth of growing medium and finish grading. Approval of growing medium material subject to soil testing and analysis. Planting is not to occur until finished grades have been approved by Contract Administrator.

SITE LAYOUT NOTES

1. Provide layout of all work for approval by Contract Administrator prior to proceeding with work. Requests for site review as required 48 hours in advance of performing any work, unless otherwise noted on this sheet.
2. Layout and verify dimensions prior to construction. Bring discrepancies to the attention of the Contract Administrator.
3. Written dimensions take precedence over scale. Do not scale drawings.
4. All plan dimensions in metres and all detail dimensions in millimetres, unless otherwise noted.
5. Where dimensions are called as 'equal' or 'eq', space referenced items equally, measured to centre line.

GENERAL PLANTING NOTES

1. Plant quantities on Plans shall take precedence over plant list quantities.
2. Provide layout of all work for approval by Contract Administrator prior to proceeding with work.
3. Plant material, installation and maintenance to conform to the current edition of the Canadian Landscape Standard.
4. Plant quantities and species may change between issuance of DP and Construction due to plant availability and design changes. Substitutions to be approved by Landscape Architect.

ON-SLAB TREE PLANTING NOTES

1. For on-slab landscape, a root barrier will be installed to protect exposed water proof membranes. A dimple board (drain mat) will be installed over the root barrier.
2. Parkade walls and foundation walls will be protected with a dimple board (drain mat) to convey water to the perimeter drain and protect wall from roots.
3. A root barrier will be installed between the tree roots and perimeter drain, to minimize tree root interference with the drain, where the follow conditions exist in on-grade planting areas: a)where trees less than 8m tall are located closer than 2m from a parkade or foundation wall; b) where trees more than 8m tall are located closer than 3m from a parkade or foundation wall; and c) where perimeter drains are less than 2m deep.

BOULEVARD PLANTING NOTES

1. Boulevard trees have been placed to avoid existing and proposed infrastructure. Trees planted within 1m of an existing underground municipal service will have a root barrier installed between the root ball and the existing infrastructure.
2. Boulevard trees will be place a minimum of 1.5m from an above ground municipal service such as fire hydrant, streetlight or driveway.
3. Boulevard tree species have been picked from the municipality's list of recommended boulevard trees or have been selected due their site-adapted qualities. Final selection of boulevard trees to be determined through consultation with municipal parks staff.
4. Irrigation to be installed as per Municipal Specifications, for all boulevard planting areas (unless otherwise indicated).
5. Design/build drawings for boulevard irrigation to be submitted to Contract Administrator in PDF and .dwg formats, at least two weeks prior to commencement of irrigation installation and will be reviewed by municipal staff.
6. Refer to Civil drawings for location of boulevard irrigation point of connection. Separate water meter and timer/controller, to be provided at point of connection. Timer/controller for boulevard areas must be readily accessible to municipal staff.
7. Boulevard irrigation to be inspected as per municipal specification by municipal staff. Boulevard tree irrigation system will be maintained and operated by municipality, after it is inspected and approved by municipal staff.
8. Soil volume for boulevard trees to be as follows: 8 cu. m. for small trees, 12 cu. m. for medium trees, and 16 cu. m. for large trees.
9. Municipal Parks staff to inspect soil and planting area of boulevard rain gardens prior to planting.
10. Street trees must have one dominant central leader or single straight trunk, 6-8 cm diameter caliper measured 15 cm above ground, and a well-balanced crown with branching starting at 1.8 m - 2.5 m above ground. Trees must be planted per the City of Victoria Supplemental Drawing SD P4 (Tree Planting in Boulevard) and SD P5 (Tree Planting in Sidewalk with Tree Guard) and the Canadian Landscape Standard.
11. Please contact Rob Hughes, rhughes@victoria.ca and also copy treepermits@victoria.ca 48 hours prior to the required inspection time to schedule an inspection.
12. Required Parks inspections for street tree planting:

    - Inspection of excavated tree pits, soil cells, root barriers. Inspection of soil and planting area prior to planting.

    - Inspection of tree stock prior to planting.

    - Inspection of installed tree - tree planting, grate/guard, stakes, etc. Trees must be in good health and condition with no visible signs of disease, insect pests, or damage, and comply with the latest version of the Canadian Landscape Standard.
13. Plant material and installation must meet or exceed the current edition of the Canadian Landscape Standard and specifications for planted landscapes as required in the MMCD. To schedule an inspection please contact Tom Sherbo, tsherbo@victoria.ca and also copy treepermits@victoria.ca 48 hours prior to the required inspection time.

    Required Parks inspections for landscaped/planted areas:

    - Inspection of excavated and scarified subgrade prior placement of the growing media.

    - Inspection of installed and prepared growing medium prior to planting.

    - Inspection of plant material on-site prior to planting.

    - Inspection of planted landscape prior to the installation of mulch.

    - Inspection when the planted and mulched landscaping meets the conditions for total performance as required in the MMCD.

14. A soil test for the growing media, for each landscape application on City Property must 1 be submitted to the City Parks treepermits@victoria.ca for review at least one week prior to soil placement. Growing media must meet the standards for each specific landscape application as required in the current edition of the Canadian Landscape Standard.

PAVING NOTES

1. Final concrete control joint layout to be confirmed by Landscape Architect prior to installation. Control joints to logically align with edges, corners, and intersections of Landscape and Architectural elements and/or as indicated on plan. Contractor to obtain layout approval by Landscape Architect prior to installation. Contractor to pour concrete pavement in alternating panels as required to achieve control joint design and to prevent cracking.
2. Cast in place concrete areas that are subject to vechicular loading shall be structurally reinforced for applicable vehicular loading requirements. See Structural Engineering drawings.

WARRANTY AND MAINTENANCE NOTES

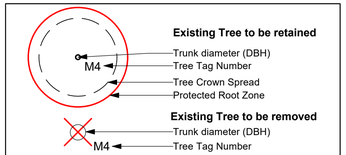

1. Contractor is responsible for Maintenance from installation to Acceptance of the work by the Contract Administrator.
2. Refer to Landscape Specifications for Maintenance Period following Acceptance.
3. Landscape installation to carry a 1-year warranty from date of acceptance. This warranty is based on adequate maintenance by the Owner after Acceptance, as determined by the Landscape Architect. The Contractor will not be responsible for plant loss or damage to other products by causes out of the Contractor's control, such as vandalism, "acts of God", "excessive wear and tear", or abuse.
4. Contractor is responsible for plant damage, failure and death due to poor delivery, storage and handling, and all other installation related aspects up until the End of Warranty period.
5. Plant material, installation and maintenance to conform with the current edition of the Canadian Landscape Standards, and the Contract Specifications

MATERIALS LEGEND

- Municipal Sidewalk *to CoV New Town Standards*
- Asphalt Paving - *(for reference only)*

HARDSCAPE SURFACES

- Concrete Paving — Cast in place, light broom finish. Sawcut control joints. Refer to Civil for parkade ramp.
- Unit Paving - Type 1 — Herringbone field with single row soldier course, to meet City of Victoria 'New Town' standards.
- Unit Paving - Type 2
- Unit Paver - on Pedestal
- Porcelain Paver - on Pedestal
- Decorative Rock Ballast
- Unit Paver Path - Maintenance Access Only — 600mm x 600mm pavers
- Concrete Steps

STEPS, RAMPS, CURBS, WALLS

- Concrete Band
- Retaining Wall - Concrete — Seat wall height. Include notched skate stops formed into wall top.
- Seat Wall - Concrete — Include notched skate stops formed into wall top.
- Architectural Wall — See Arch
- Concrete Edge Restraint
- Basalt Band — 450 mm width, to meet CoV 'New Town' Standard.
- Concrete Curb — See Civil

SOFTSCAPE

- Planting Area -Tree & Shrub -On Grade — -600mm Depth; -Shrub Growing Medium.
- Planting Area -Tree & Shrub -On Slab — -Depth Varies, See Plan; -Type 1P growing medium. *Confirm maximum depth allowable as per Structural Drawings.*
- Planting Area -Rain Garden -On Grade — -600mm Depth; -Rain Garden Growing Medium.
- Planting Area -Rain Garden -On Slab — -600mm Depth Average; -Rain Garden Growing Medium.
- Grass - On Grade — -170mm Depth (*unless otherwise noted*)
- Artificial Turf - On Slab — -170mm Depth (*unless otherwise noted*)
- Gravel Maintenance Edge

FENCING & RAILS

- Fence - Wood — 1800mm height
- Gate
- Screen/Trellis Structure
- Guard Rail
- Chain Link Fence
- Split Rail Fence — Cedar split rail, 2-3 rails high.

SITE FURNISHINGS

- Bike Rack
- Bench
- Seat Wall Bench Topper
- Raised Deck/Seating
- Raised Planters — Metal, colour to match building cladding
- Waste Receptacle — To meet City of Victoria 'New Town' standards.
- Bollard — To meet City of Victoria 'New Town' standards.
- Chair — To meet City of Victoria 'New Town' standards.
- Landscape Boulder
- Bistro Table and Chairs — Moveable
- Bistro Table and Chairs — To be bolted down.
- Custom Deck Element — Raised lounge deck c/w raised planting zones, tables and chairs.
- Table
- Storage Shed

ALL DRAWINGS TO BE READ IN ASSOCIATION WITH CONTRACT SPECIFICATIONS.

Catchment 11	382	-	-	-	-	-	-
total		97			235	188	

Excess (+) or Deficient (-) Storage Volume required to be managed by Green Stormwater Infrastructure **88**

Assumptions

* Design storm is 32mm of water, in a 24 hr period.

** Landscaped areas require minimum 170mm depth of growing medium in order to manage 32mm rainfall / 24 hours (assuming 20% void space). Engineeered green roof systems that are shown to meet the minimum requirements may also be included.

*** Rain Garden capacity based on 200 mm live ponding plus 20% of the sand/ compost growing medium volume (assuming growing medium has 20% void space) with a minimum infiltration rate of 2 cm/hour (or 48 cm per day), via perforated underdrain.

PLOTTED: 2026-03-27 - 12:55 PM

NOTE: ALL SERVICE CONNECTION SIZES HAVE BEEN ASSUMED AND WILL BE CONFIRMED WITH MECHANICAL ENGINEER DURING DETAILED DESIGN.

ENGINEERING NOTES:

1. ALL CONSTRUCTION AND MATERIALS TO BE IN ACCORDANCE WITH THE LATEST VERSION OF THE CITY OF VICTORIA SPECIFICATIONS, MASTER MUNICIPAL CONSTRUCTION DOCUMENT (MMCD) PLATINUM EDITION, AND THESE DRAWINGS.
2. ALL CONSTRUCTION SURVEY LAYOUT TO BE PROVIDED BY THE CONTRACTOR.
3. PERMIT TO CONSTRUCT WORKS ON CITY RIGHT-OF-WAY MUST BE OBTAINED FROM THE CITY ENGINEERING DEPARTMENT BEFORE WORKS COMMENCE. NOTIFY CITY OF VICTORIA 48 HOURS PRIOR TO CONSTRUCTION.
4. ALL SERVICE LOCATIONS AND CROSSINGS ARE NOT GUARANTEED AS TO THEIR ACCURACY. LOCATIONS OF ALL EXISTING SERVICES, FEATURES AND APPURTENANCES SHOWN ON THE DRAWINGS ARE TO BE CONSIDERED APPROXIMATE ONLY. VERIFY ALL LOCATIONS IN THE FIELD PRIOR TO CONSTRUCTION.
5. CONTACT BC-1 (1-800-474-6886), BC HYDRO, TELUS, SHAW CABLE, AND FORTIS BC FOR UNDERGROUND UTILITY LOCATIONS 72 HOURS PRIOR TO CONSTRUCTION.
6. EXISTING SERVICES MUST BE EXPOSED AT CROSSING POINTS PRIOR TO CONSTRUCTION.
7. ANY CONFLICT BETWEEN EXISTING INFRASTRUCTURE AND THE DESIGN TO BE RELAYED TO ENGINEER AND CITY TECHNICIAN IMMEDIATELY.
8. ADJUST ALL PROPOSED AND EXISTING APPURTENANCES TO MEET FINAL DESIGN GRADES.
9. CITY CREWS TO INSTALL ALL SEWER AND DRAIN CONNECTIONS AND SERVICES UP TO THE PROPERTY LINE, AT THE DEVELOPER'S EXPENSE.
10. WATER SERVICE CONNECTIONS ARE TO BE INSTALLED TO NEW METER AT THE PROPERTY LINE BY THE CITY OF VICTORIA MUNICIPAL CREW, AT THE DEVELOPER'S EXPENSE. THE CONTRACTOR SHALL NOT OPERATE ANY WATERMAIN OR SERVICE VALVES.
11. CONTRACTOR IS RESPONSIBLE FOR COORDINATION WITH ALL PARTIES REQUIRED FOR SERVICING TO PROPERTY LINE, INCLUDING ABANDONMENT OF EXISTING SERVICES. CAP ABANDONED HYDRO/TEL/SHAW CONDUIT 300mm OUTSIDE PROPERTY LINE.
12. UNDERGROUND WIRING TO BE CONSTRUCTED IN ACCORDANCE WITH BC ELECTRICAL CODE, BC HYDRO/TEL DRAWINGS AND SPECIFICATIONS.
13. OVERHEAD WIRING IS NOT SHOWN ON CONTRACT DRAWINGS.
14. STREETS SHALL BE SWEPT CLEAN ON A REGULAR BASIS TO REMOVE ANY CONSTRUCTION DEBRIS.
15. ALL CONSTRUCTION TO BE IN ACCORDANCE WITH CITY OF VICTORIA STORMWATER BYLAW.
16. DISPOSE OF ALL UNSUITABLE EXCAVATED MATERIAL AS PER SPECIFICATIONS, IN ACCORDANCE WITH ALL APPLICABLE REGULATIONS.
17. ALL TRAFFIC CONTROL TO CONFORM TO THE MOST CURRENT WORKSAFE BC, MMCD AND MINISTRY OF TRANSPORTATION SPECIFICATIONS (TRAFFIC CONTROL MANUAL FOR WORK ON ROADWAYS).
18. PROVIDE TRAFFIC CONTROL, SIGNAGE, BARRICADES, ILLUMINATION, AND DETOUR ROUTING AS REQUIRED TO MAINTAIN TRAFFIC FLOW AND EMERGENCY VEHICLE ACCESS. OUTBOUND ARTERIAL ROAD TRAVEL LANES TO BE OPEN AFTER 3:00 PM.
19. THE CONTRACTOR WILL BE HELD RESPONSIBLE FOR THE REPAIR OF ANY DAMAGE CAUSED TO EXISTING STREETS OR SERVICES BY CONSTRUCTION EQUIPMENT AND/OR TRUCKS HAULING MATERIALS TO THE SITE. THIS WILL INCLUDE DAILY CLEANING OR SWEEPING ALL EXISTING ROADS OF DIRT AND DEBRIS CAUSED BY CONSTRUCTION ACTIVITY.
20. ALL ASPHALT AND CONCRETE CUTS TO BE SQUARE CUT WITH SAW.
21. COORDINATE CONSTRUCTION OF ALL WORKS WITHIN ROADWAYS WITH CITY OF VICTORIA WORKS CREWS.
22. REFER TO ELECTRICAL AND MECHANICAL DRAWINGS FOR BC HYDRO, TELUS, SHAW CABLE AND FORTIS BC UTILITY CONSTRUCTION DETAILS.
23. FIELD SURVEY COMPLETED BY GEOVERRA 2020/2021.
24. CONTRACTOR IS TO PROVIDE AS-CONSTRUCTED DRAWING MARKUPS TO ENGINEER UPON CONSTRUCTION COMPLETION.
25. ASPHALT TO BE REPLACED FULL DEPTH TO ROAD CENTERLINE ON ALL FRONTAGES.
26. DEVELOPER TO PROVIDE TESTING TO CHARACTERIZE SOILS FOR HANDLING AND DISPOSAL FOR ALL OFFSITE SERVICE CONNECTIONS WITHIN THE ROAD ROW.

IRRIGATION NOTES:

1. ALL IRRIGATION WORK, INCLUDING REQUIRED INSPECTIONS, SHALL FOLLOW THE SUPPLEMENTARY SPECIFICATIONS FOR STREET TREES AND IRRIGATION, SCHEDULE C TO THE CITY OF VICTORIA SUBDIVISION AND DEVELOPMENT SERVICING BYLAW 12-042, AND COMPLY WITH THE IRRIGATION INDUSTRY ASSOCIATION OF BC STANDARDS.
2. IRRIGATION DESIGN SHALL BE SUBMITTED FOR REVIEW AND APPROVAL TO CITY OF VICTORIA PARKS NO LESS THAN 30 DAYS PRIOR TO SCHEDULED INSTALLATION.
3. CONTACT PARKS AT 250-361-0600 WITH AT LEAST 48HOURS (2 BUSINESS DAYS) NOTICE TO ARRANGE FOR IRRIGATION INSPECTIONS.

REQUIRED PARKS INSPECTIONS FOR IRRIGATION:
1. IRRIGATION SLEEVING PRIOR TO BACKFILLING.
2. OPEN TRENCH MAINLINE AND LATERAL LINES.
3. PRESSURE TEST.
4. IRRIGATION SYSTEM, CONTROLLER, COVERAGE TEST, BACKFLOW PREVENTER ASSEMBLY TEST REPORT REQUIRED, BACKFLOW ASSEMBLY (INCL. INSPECTION TAG AND TESTING REPORT).

NOTE:
INSTALLATION OF THE WATER SERVICE TO BE AT THE EXPENSE OF THE APPLICANT. PARKS IS NOW REQUESTING THAT 100mm SDR 28 PIPE BE USED FOR IRRIGATION SLEEVING UNDER HARD SURFACES. INSTALLATIONS WHERE A 90° BEND IS REQUIRED SHOULD BE INSTALLED USING 100mm SDR 28 GSX (22.5°) LONG SWEEPS. PLEASE INSTALL AT 400mm DEPTH.
